

# POSIFILL DP Depositing System

## universal

FILLING MACHINE COMPANY

- Designed specifically for food production areas
- Fills liquids with particles up to 20mmø
- Tool free stripdown & adjustments
- Simple user friendly operation
- Low maintenance
- Fast, accurate & reliable
- Automate into existing lines

fulfilling your needs

Manufactured to the highest standards the POSIFILL DP has to be one of the most versatile depositing & filling systems on the market. Robustly constructed & designed specifically for the food industry with tool free stripdown for easy cleaning, it will appeal to other industry sectors who are filling liquids, pastes & gels containing particles up to 25mm diameter.

The machine incorporates Universals unique rotary valve filling system, which is 100% watertight. This means that unlike some other depositing machines, the POSIFILL DP can draw many products up from floor level tanks removing the need for hoppers & transfer pumps.

All metal contact parts are manufactured in 316 stainless steel and seals are in FDA approved plastics.

The machine can be supplied for semi-automatic operation & started by foot pedal or integrated into a fully automatic system controlled by sensors and/or pneumatic gates.

Tool free stripdown

#### General Machine Specifications:

- Fills food products such as curry sauce, bolognaise, chilli sauce, meat & fruit pie fillings, pickles, chutneys, baked beans, soups & casseroles
- Dispensing volumes from 50ml – 1.3 litres
- Filling speeds up to 60 cycles per minute
- Fill accuracy up to +/- 0.5%
- Semi-automatic (foot pedal)

#### Optional Equipment:

- Automatic versions with conveyors & gating systems
- Portable tables & trolleys
- Overhead hoppers & low level feed tanks
- Multi-head versions
- Supplied with tray forming & sealing equipment
- Incorporate into bagging & sachet forming machines
